

1.1.1 The institution ensures effective curriculum planning and delivery through a well-planned and documented process including academic calendar and conduct of continuous internal assessments.

Bapatla College of Pharmacy was established in the year 1995, on a sprawling campus of 50 acres, approved by Pharmacy Council of India, New Delhi and affiliated to the then Jawaharlal Nehru Technological University, Hyderabad. Later in 2008, it was affiliated to Jawaharlal Nehru Technological University in the port city of Kakinada after the trifurcation of JNTU, Hyderabad. We offer graduate and post graduate programs in Pharmacy to fit in production, quality control, marketing and clinical research. The institution had produced highly professional and competitive pharmacists by infusing greater quality and educating the students with appropriate skills suitable for a rapidly challenging industrial scenario.

Curriculum implementation:

The B.Pharm Program committee consisting of senior faculty, class coordinators and student representatives meet at regular intervals to discuss deliberately about academic issues. The Internal Quality Assurance Cell (IQAC) led by the coordinator ensures the effectual implementation of the curriculum through a structured process following the University academic calendar.

Academic calendar:

The university provides academic ephemeris for each semester at the beginning of the academic year for both undergraduate and post graduate programs and we strictly adhere to the calendar prescribed by the university. The timetable for the internal assessment is displayed well in advance and we promptly follow the modifications made by the university from time to time. The evaluation process is transparent and the answer booklets are handed over the students to let them know about their performance in the relevant subject, the mark of transparency in the system.

Curriculum Delivery:

The Institution ensures effective curriculum delivery through a well planned process with class coordinators preparing semester-wise time tables in the beginning of each academic year. The primary role of faculty is to facilitate student learning valuable using various teaching techniques and strategies simplifying learning efforts. Laboratory classes are dedicated for demonstration and practice whereas tutorial classes are conducted to support continuous evaluation and remedial classes for enhancement of the performance for below average students. We have a pilot plant laboratory equipped with modish equipment for industrial processes providing hands- on training to the students. The institution also develops communication and professional skills through e-learning sources like Coursera & Infosys spring board. Initiatives for student's growth include orientation programs, personality development and career guidance programs, guest lectures, seminars and workshops. Industrial tours are planned during the course period which offer an immense learning experience like no other institution

and provide a platform to broaden their horizons. A mentoring system is employed to enhance students' academic performance with each faculty assigned to a group of twenty to twenty five students.

Continuous Internal Assessment:

Students' progress is monitored through internal examinations including class tests, quizzes, assignments, seminars, viva voce in practical classes, attendance in addition to the two sessional examinations for each course as prescribed by the university.

MID Model Paper

Objective test

I. Answer all Questions.

10 x 1 = 10M

(Multiple Choice Questions (MCQs) = 10 x 1 = 10 / Objective Type Questions (5 x 2) = 5 x 2 = 10)

Subjective test

II. Long Answers (Answer 1 out of 2) = 1 x 10 = 10

1.

2.

III. Short Answers (Answer 2 out of 3) = 2 x 5 = 10

3.

4.

5.
